PROFESSIONAL SUMMARY

Full Stack Developer specializing in .NET and React with hands-on experience building production-grade APIs, optimizing SQL performance, and delivering end-to-end features in Agile teams. Developed 20+ APIs, improved response times by 30%, and shipped multiple modules used in testing and staging environments.

TECHNICAL SKILLS

Programming: C#, JavaScript, SQL, HTML5, CSS3 | **Backend:** ASP.NET Core, EF Core, ADO.NET, Dapper, REST APIs | **Database:** SQL Server, Stored Procedures, Query Optimization | **Frontend:** React.js, Context API, Tailwind CSS, Bootstrap | **Cloud:** Azure App Service, Azure SQL, Deployment | **Tools:** Git, GitHub, Visual Studio, VS Code, npm, SSMS | **Concepts:** OOP, Clean Architecture, API Design, Performance Optimization, Agile/Scrum

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern — Bridgeon Solutions LLP, Calicut | Apr 2025 – Present

- Delivered 20+ RESTful ASP.NET Core APIs powering product, cart, and order modules.
- Reduced API response times by 30% through SQL and stored-procedure optimization.
- Integrated React frontends across 10+ features in coordination with backend and QA teams, enabling real-time data flow.
- Built reusable and responsive UI components using Tailwind CSS and Bootstrap across multiple modules, reducing UI development effort by 25%.
- Resolved 40+ defects across QA cycles, accelerating release timelines and improving system reliability in production environments.
- Implemented a structured peer-review process enforcing clean architecture standards, reducing post-release defects and accelerating sprint delivery.
- Led feature delivery for backend modules by coordinating with QA and frontend teammates across sprint cycles.

PROJECTS

SportX — Football Accessories E-Commerce Platform | [Live Demo](#)

- Built and deployed a full-stack e-commerce platform serving 500+ test users with secure checkout workflows.
- Delivered 15+ backend APIs for product, cart, authentication, and order modules.
- Implemented role-based access control across customer, admin, and vendor roles.
- Improved checkout and browsing speed by 35% via SQL and API optimization.
- Deployed and maintained the application using GitHub pipelines and Vercel, supporting iterative releases and production testing.

Tech Stack: ASP.NET Core Web API, SQL Server, Dapper, React.js, Tailwind CSS, GitHub, Vercel

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Microsoft Learn — ASP.NET Core APIs
- SQL Performance Tuning
- React Development Course

EDUCATION

Bachelor of Science in Chemistry — 2022–2025

Relevant coursework: Databases, Data Structures, Web Development
